To learn more about nutritional solutions for food allergies or other conditions, talk to your Nestlé Health Science Paediatric Account Specialist.

ALFAMINO® and ALFARÉ® are infant formula products for special dietary use and must be used under medical supervision. They are not suitable for general use.

**IMPORTANT NOTICE:** Breast milk is best for babies and provides ideal nutrition. Good maternal nutrition is important for the preparation and maintenance of breastfeeding. Introducing partial bottle feeding could negatively affect breastfeeding and reversing a decision not to breastfeed is difficult. Professional advice should be followed on infant feeding. Infant formula should be prepared and used exactly as directed or it could pose a health hazard. The preparation requirements and weekly cost of providing infant formula until 12 months of age should be considered before making a decision to formula feed.

Mothers should be encouraged to continue breastfeeding even when their infants have cow's milk protein allergy. If a decision to use an infant formula for special dietary use is taken, it must be used under medical supervision.

VIVONEX® Pediatric is a food for special medical purposes, specifically formulated for the dietary management of children with maldigestion, malabsorption and other related medical conditions that result in severely impaired GI functions. Must be used under medical supervision.

**INFORMATION FOR HEALTHCARE PROFESSIONAL ONLY**  
**BREASTFEEDING IS BEST FOR BABIES**

PEPTAMEN® Junior is a food for special medical purposes, specifically formulated for the dietary management of gastrointestinal impairment in children aged 1-10 years. Must use under medical supervision.

ALFAMINO® Junior is a food for special medical purposes specifically formulated for the dietary management of children with multiple food allergies (including cow's milk allergy) and malabsorptive conditions. Must be used under medical supervision.

SUSTAGEN® KID ESSENTIALS®, ISOSOURCE® Junior 0.6 cal and ISOSOURCE® Junior Energy are foods for special medical purposes, specifically formulated for medical conditions where nutritional needs cannot be met by diet modification alone and must be used under medical supervision.

**CAN TURN YOUR  
PATIENT'S WORLD  
UPSIDE DOWN**

EXTENSIVELY HYDROLYSED FORMULA  
0-12 MONTHS

ALFARÉ®

A semi-elemental infant formula based on extensively hydrolysed whey protein specifically formulated for the dietary management of formula-fed infants with severe allergy and/or food intolerance.

- Clinically proven to manage CMPA symptoms
- Extensively hydrolysed formula (eHF) of whey protein
- Small peptides and amino acids lower the potential to cause allergy
- MCT 40% of fat for optimal fat absorption
- LC-PUFAs for brain, eye and nervous system development
- Indications: CMPA, soy protein allergy, protracted diarrhoea, maldigestion and malabsorption disorders

AMINO ACID FORMULA  
0-12 MONTHS

ALFAMINO®

An amino-acid based formula specifically formulated for the dietary management of formula-fed infants with severe allergy and/or food intolerance.

- Amino acid formula (AAF) based on 100% free amino acids
- Neutral taste to help administration and compliance
- MCT 25% of fat
- Contains structured lipids similar to those found in breast milk
- Indications: Severe cow's milk protein allergy including anaphylaxis, multiple food protein allergy

AMINO ACID FORMULA  
12 MONTHS +

ALFAMINO® JUNIOR

An amino-acid based formula specifically formulated for the dietary management of children (above 1 year of age) with multiple food allergies and malabsorptive conditions.

- Amino acid formula (AAF) based on 100% free amino acids
- Neutral taste to help administration and compliance
- MCT 64% of fat
- Indications: Severe cow's milk protein allergy including anaphylaxis, multiple food protein allergy and intestinal malabsorptive conditions
