ALFAMINO® and ALFARÉ® are infant formula products for special dietary use and must be used under medical supervision. They are not suitable for general use.

IMPORTANT NOTICE: Breast milk is best for babies and provides ideal nutrition. Good maternal nutrition is important for the preparation and maintenance of breastfeeding. Introducing partial bottle feeding could negatively affect breastfeeding and reversing a decision not to breastfeed is difficult. Professional advice should be followed on infant feeding. Infant formula should be prepared and used exactly as directed or it could pose a health hazard. The preparation requirements and weekly cost of providing infant formula until 12 months of age should be considered before making a decision to formula feed.

Mothers should be encouraged to continue breastfeeding even when their infants have cow's milk protein allergy. If a decision to use an infant formula for special dietary use is taken, it must be used under medical supervision.

VIVONEX® Pediatric is a food for special medical purposes, specifically formulated for the dietary management of children with maldigestion, malabsorption and other related medical conditions that result in severely impaired GI functions.

INFORMATION FOR HEALTHCARE PROFESSIONAL ONLY
BREASTFEEDING IS BEST FOR BABIES

PEPTAMEN® Junior is a food for special medical purposes, specifically formulated for the dietary management of gastrointestinal impairment in children aged 1-10 years. Must use under medical supervision.

ALFAMINO® Junior is a food for special medical purposes specifically formulated for the dietary management of children with multiple food allergies (including cow's milk allergy) and malabsorptive conditions.

SUSTAGEN® KID ESSENTIALS®, ISOSOURCE® Junior 0.6 cal and ISOSOURCE® Junior Energy are foods for special medical purposes, specifically formulated for medical conditions where nutritional needs cannot be met by diet modification alone and must be used under medical supervision.

ALLERGY

ALFARÉ®

ALFARÉ® is a semi-elemental infant formula based on extensively hydrolysed whey protein specifically formulated for the dietary management of formula-fed infants with severe allergy and/or food intolerance.

- Clinically proven to manage CMPA symptoms
- Extensively hydrolysed formula (eHF) of whey protein
- Small peptides and amino acids lower the potential to cause allergy
- MCT 40% of fat for optimal fat absorption
- LCF-PUFAs for brain, eye and nervous system development
- Indications: CMPA, soy protein allergy, protracted diarrhoea, maldigestion and malabsorption disorders

ALFAMINO®

ALFAMINO® is an amino-acid based formula specifically formulated for the dietary management of formula-fed infants with severe allergy and/or food intolerance.

- Amino acid formula (AAF) based on 100% free amino acids
- Neutral taste to help administration and compliance
- MCT 25% of fat
- Contains structured lipids similar to those found in breast milk
- Indications: Severe cow's milk protein allergy including anaphylaxis, multiple food protein allergy

ALFAMINO® JUNIOR

ALFAMINO® Junior is an amino-acid based formula specifically formulated for the dietary management of children (above 1 year of age) with multiple food allergies and malabsorptive conditions.

- Amino acid formula (AAF) based on 100% free amino acids
- Neutral taste to help administration and compliance
- MCT 64% of fat
- Indications: Severe cow's milk protein allergy including anaphylaxis, multiple food protein allergy and intestinal malabsorptive conditions

GASTROINTESTINAL

PEPTAMEN® JUNIOR

PEPTAMEN® Junior is a nutritionally balanced, peptide based enteral formula for children aged 1-10 years, for the dietary management of gastrointestinal impairment. It is suitable as a tube feed or oral feed for children requiring nutritional support.

- 1.0 kcal/mL at standard dilution (can be concentrated up to 1.5 kcal/mL)
- 100% whey protein peptides
- 3g of protein per 100mL at standard dilution
- MCT 54% of fat to help minimize fat malabsorption
- Low osmolality of 370 mOsm/kg water
- Indications: Fat malabsorption due to liver disease, short gut syndrome, cystic fibrosis, gastrointestinal disorders

VIVONEX® PEDIATRIC

VIVONEX® Pediatric is an elemental formula containing 100% free amino acids specifically designed for children aged 1 to 10 years.

- 0.8 kcal/mL after reconstitution with 220 mL water
- 100% free amino acids
- 6 grams of protein* per serve (250mL)
- MCT 68% of fat
- Low osmolality 360 mOsm/kg water

*6g of amino acids - key building blocks of protein.

TUBE FEEDS

ISOSOURCE® JUNIOR 0.6 kcal

ISOSOURCE® Junior 0.6 kcal is formulated for use in children aged 1 year and above with neuromuscular disorders or reduced caloric needs. It is made with real food ingredients including chicken, fruit, vegetables and cranberry juice.

- 0.6 kcal/mL
- 30g/L of protein (20% energy) to support muscle mass
- MCT 20% of fat
- Fibre content 10g/L (pea, inulin and FOS)
- High in calcium (1440 mg/L) and vitamin D (25 µg/L)
- Osmolality 300 mOsm/kg water

ISOSOURCE® JUNIOR ENERGY

ISOSOURCE® Junior Energy is a 1.5 kcal/mL formula for use in children above 1 year of age who cannot meet their nutritional needs through diet modification alone.

- Contains whey and casein (45:55) for tolerance and absorption
- Osmolality 400 mOsm/kg water
- 500mL SMARTFLEX® for bolus or continuous feeding
